The problem

High-stakes conversations demand your full attention — exactly when you most need help.

1

You can't look away

Salary talks, deals, big purchases — glancing at a phone breaks eye contact and signals weakness. The help has nowhere to live.

2

Information arrives too late

The right counter-offer or market price is useless after the moment has passed. Negotiation is real-time or it's nothing.

3

Most people negotiate blind

Without prep or live data, people leave money on the table on the most expensive decisions of their lives.

On glasses, the advisor finally has a home: in your field of view, the instant it matters.

The solution — working today

Our live web/desktop app already does the hard part: listen, understand, and coach in real time. XR is the natural home for it.

UNKNOWN • 05:30 AM

I want to sell my iPhone 14 Pro Max for \$800.

USER • 08:10 AM

Okay, that sounds good. I will try to be able to buy iPhone 14 Pro Max for \$200. I can buy it for around \$500.

COUNTERPARTY • 08:10 AM

That's why I won't be able to sell you for \$5. Hmm.

USER • 08:11 AM

AI ADVISOR

I'm here when you're ready.

AI • 08:11 AM

What should I do

USER • 08:11 AM

Since you've rejected their \$500 offer and your target is \$800, the next step is to make a counteroffer. You could propose something in the middle, like \$700, to see if they're willing to negotiate.

AI • 08:11 AM

think about what you want to do

USER • 08:11 AM

Counter their offer of \$500 with a price closer to your target, such as \$700.

Neutral

Their Goal

To purchase the iPhone 14 Pro Max for a significantly lower price than the user's asking price.

Key Moments

User rejects the counterparty's offer.

Counterparty makes an initial low offer of \$200, then suggests \$500.

User rejects the counterparty's low offer.

Leverage Points

Counterparty's low offer of \$500 compared to the user's \$800 asking price.

Market Research

Price Range: \$600–\$800 for a used iPhone 14 Pro Max in good condition, unlocked, based on various resale platforms and discussions | Key Facts: The value of iPhones, including the iPhone 14 Pro Max, depreciates over time, especially with the release of newer models. Condition, storage capacity, and whether the device is unlocked significantly impact its resale price. | Leverage: The current market value for a used iPhone 14 Pro Max in good condition is generally higher than the counterparty's \$500 offer, providing you with an information advantage

Balaastratech • AI Negotiation Copilot

Live session: selling an iPhone 14 Pro Max. The copilot extracts item, prices & sentiment, flags the \$500-vs-\$800 leverage gap, pulls market data, and says “counter at ~\$700” —

Why Android XR — why glasses

This is a glanceable, hands-free, conversational utility — the exact profile Google describes for Display & Audio glasses.

Eyes-up & hands-free

Coaching on the lens; no phone, no broken eye contact.

Real-time & ambient

Sub-second cards appear the moment leverage shifts.

Voice-first

“Ask AI” by voice; spoken guidance back.

All-day contextual

From a car lot to a boardroom — always ready.
